ABOUT ME

Front-end web developer and UX/UI designer with two and a half years of experience driving the creation of engaging and functional user experiences. I possess strong technical skills and a collaborative and creative approach, which has allowed me to design and develop effective web solutions for a variety of industries, including e-commerce, trading, software consulting, investment, financial and tax consulting. My ability to understand and address the specific needs of each project allows me to deliver optimal and functional results.

WORK EXPERIENCE

Web Front-end developer & UX/UI Designer, IGD S.A.S | 10/2022 - 02/2025

I worked as a front-end web developer and lead UX/UI designer. Collaborating with a full team, I maintained high standards in crafting functional and intuitive user experiences across web and mobile platforms. My responsibilities spanned the UX/UI design and front-end development lifecycle, including the design, redesign, development, maintenance and migration of numerous landing pages, e-commerce platforms and financial management/trading systems. This involved creating wireframes and prototypes to define user flows and designing visually appealing interfaces using tools such as Figma or Framer, ensuring a smooth and efficient user journey. On the front-end, I used technologies such as ReactJS, ViteJS, Tailwind, VueJS and Zustand to bring these designs to life.
